About the Special Issue Editor	vii
Goutam Koley Editorial for the Special Issue on MEMS/NEMS Sensors: Fabrication and Application Reprinted from: <i>Micromachines</i> 2019 , <i>10</i> , 554, doi:10.3390/mi10090554	1
Qifeng Qiao, Ji Xia, Chengkuo Lee and Guangya Zhou Applications of Photonic Crystal Nanobeam Cavities for Sensing Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 541, doi:10.3390/mi9110541	4
Bo Yang, Binlong Wang, Hongyu Yan and Xiaoyong Gao Design of a Micromachined Z-axis Tunneling Magnetoresistive Accelerometer with Electrostatic Force Feedback Reprinted from: <i>Micromachines</i> 2019 , <i>10</i> , 158, doi:10.3390/mi10020158	35
Zhengcheng Qin, Yang Gao, Jia Jia, Xukai Ding, Libin Huang and Hongsheng Li The Effect of the Anisotropy of Single Crystal Silicon on the Frequency Split of Vibrating Ring Gyroscopes Reprinted from: <i>Micromachines</i> 2019 , <i>10</i> , 126, doi:10.3390/mi10020126	50
Milče M. Smiljanić, Žarko Lazić, Branislav Radjenović, Marija Radmilović-Radjenović and Vesna Jović Evolution of Si Crystallographic Planes-Etching of Square and Circle Patterns in 25 wt % TMAH Reprinted from: <i>Micromachines</i> 2019 , <i>10</i> , 102, doi:10.3390/mi10020102	63
Liqun Wu, Ting Zhang, Hongcheng Wang, Chengxin Tang and Linan Zhang A Novel Fabricating Process of Catalytic Gas Sensor Based on Droplet Generating Technology Reprinted from: <i>Micromachines</i> 2019 , <i>10</i> , 71, doi:10.3390/mi10010071	77
Yu-Sian Liu and Kuei-Ann Wen Implementation of a CMOS/MEMS Accelerometer with ASIC Processes Reprinted from: <i>Micromachines</i> 2019 , <i>10</i> , 50, doi:10.3390/mi10010050	88
Sungil Kim, Jeongtae Kim, Yeun-Ho Joung, Jiyeon Choi and Chiwan Koo Bonding Strength of a Glass Microfluidic Device Fabricated by Femtosecond Laser Micromachining and Direct Welding Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 639, doi:10.3390/mi9120639	103
Yu-Sian Liu and Kuei-Ann Wen Monolithic Low Noise and Low Zero-g Offset CMOS/MEMS Accelerometer Readout Scheme Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 637, doi:10.3390/mi9120637	114
Yingchun Peng, Guoguo Wu, Chunpeng Pan, Cheng Lv and Tianhong Luo A 5 g Inertial Micro-Switch with Enhanced Threshold Accuracy Using Squeeze-Film Damping Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 539, doi:10.3390/mi9110539	128
Qi Liu, Guifu Ding, Yipin Wang and Jinyuan Yao Thermal Performance of Micro Hotplates with Novel Shapes Based on Single-Layer SiO ₂ Suspended Film Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 514, doi:10.3390/mi9100514	140

Jia Jia, Xukai Ding, Yang Gao and Hongsheng Li Automatic Frequency Tuning Technology for Dual-Mass MEMS Gyroscope Based on a Quadrature Modulation Signal Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 511, doi:10.3390/mi9100511	152
Jian Huang, Quan Wen, Qiuyu Nie, Fei Chang, Ying Zhou and Zhiyu Wen Miniaturized NIR Spectrometer Based on Novel MOEMS Scanning Tilted Grating Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 478, doi:10.3390/mi9100478	170
Hanlin Feng, Xiaodan Miao and Zhuoqing Yang Design, Simulation and Experimental Study of the Linear Magnetic Microactuator Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 454, doi:10.3390/mi9090454	179
Zilei Yu, Lin Zeng, Hongpeng Zhang, Guogang Yang, Wenqi Wang and Wanheng Zhang Frequency Characteristic of Resonant Micro Fluidic Chip for Oil Detection Based on Resistance Parameter Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 344, doi:10.3390/mi9070344	189
Yunmei Fang, Juntao Fei and Yuzheng Yang Adaptive Backstepping Design of a Microgyroscope Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 338, doi:10.3390/mi9070338	200
Durga Gajula, Ifat Jahangir and Goutam Koley High Temperature AlGaIn/GaN Membrane Based Pressure Sensors Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 207, doi:10.3390/mi9050207	213
Zhiqiang Zhang and Yao Ma DC-25 GHz and Low-Loss MEMS Thermoelectric Power Sensors with Floating Thermal Slug and Reliable Back Cavity Based on GaAs MMIC Technology Reprinted from: <i>Micromachines</i> 2018 , <i>9</i> , 154, doi:10.3390/mi9040154	222
