## CONTENTS

<b>CHAPTER 1</b>	<b>INFORMATION OF PROJECT .....</b>	<b>11</b>
1.1	LOCATION OF PROJECT .....	11
1.2	FUNCTION:.....	12
1.3	THE DESIGN CONTENT.....	15
1.3.1	ACMV System.....	15
1.3.2	Electrical System. ....	16
1.3.3	Building managementsystem (BMS).....	17
1.3.4	WATER SUPPLY AND DRAINAGE – FIRE FIGHTING .....	18
<b>CHAPTER 2</b>	<b>COOLING LOAD CALCULATION.....</b>	<b>20</b>
2.1	CALCULATING PARAMETERS: .....	20
2.2	COOLING LOAD CALCULATION BY CARRIER METHOD .....	23
2.2.1	Sensible heat transfer in room by heat radiation through glazing $Q_{11}$ .....	23
2.2.2	Sensible heat transfer in room by heat radiation through roof $Q_{21}$ .....	25
2.2.3	Sensible Heat transfer through walls, windows, doors $Q_{22W}$ .....	26
2.2.4	Sensible heat transmitted through the floor $Q_{23}$ .....	30
2.2.5	Sensible heat emitted by the lamps $Q_{31}$ .....	32
2.2.6	Sensible heat emitted by the machinery $Q_{32}$ .....	36
2.2.7	Sensible heat and latent heat from person $Q_4$ .....	44
2.2.8	Sensible and latent heat by fresh air $Q_{5h}$ & $Q_{5a}$ .....	47
2.2.9	Sensible and latent heat by air $Q_{6h}$ và $Q_{6a}$ .....	50
2.2.10	Total of cooling capacity .....	54
2.3	COOLING LOAD BY HAP SOFTWARE.....	58
2.3.1	Running room model : 1 <sup>st</sup> floor, Fire room.....	58
2.4	TABLE SUMMARY COOLING LOAD BY two METHODS .....	61

<b>CHAPTER 3</b>	<b>ANALYSIS OF DESIGN OPTIONS .....</b>	<b>64</b>
3.1	AIR CONDITIONING CHILLER SYSTEM:.....	64
3.2	VRV AIR CONDITIONER: .....	66
3.3	Selection of the air-conditioning system for construction.....	67
<b>CHAPTER 4</b>	<b>ESTABLISHMENT AND CALCULATION AIR CONDITIONING DIAGRAM .....</b>	<b>69</b>
4.1	HEAT FACTORS IN AIR CONDITIONER.....	69
4.1.1	ROOM SENSIBLE HEAT FACTOR: RSHF .....	69
4.1.2	GRAND SENSIBLE HEAT FACTOR: GSHF.....	69
4.1.3	BYPASS FACTOR: $\epsilon BF$ .....	69
4.1.4	EFFECTIVE SENSIBLE HEAT FACTOR: ESHF .....	70
4.1.5	Dew point temperature of equipment .....	70
4.1.6	Air temperature after indoor unit.....	70
4.1.7	Check the room temperature and blow in temperature.....	71
4.1.8	Cooling capacity of air conditioning system .....	71
4.1.9	Air conditioner diagram.....	72
4.1.10	Example .....	73
4.2	SELECTING FCU AND AHU DEVICES .....	80
<b>CHAPTER 5</b>	<b>REFRIGERANT CYCLE CALCULATION.....</b>	<b>89</b>
5.1	REFRIGERANT CYCLE CALCULATION AND SELECTION .....	89
5.1.1	Refrigerant selection.....	89
5.1.2	CHOICE OF REFRIGERANT.....	91
5.1.3	Heat chart:.....	92
5.2	COMPRESSOR CALCULATION AND SELECTION .....	96
5.2.1	Compressor calculation .....	96
5.2.2	Choose the chiller combination: .....	99
<b>CHAPTER 6</b>	<b>CONDENSER CALCULATION .....</b>	<b>100</b>

condenser CALCULATION .....	100
6.1.1 Analysis options condensers .....	100
6.1.2 Condenser design calculation .....	100
6.1.3 Hydrodynamic condenser calculation: .....	108
6.1.4 Strength condenser calculation: .....	108
6.2 Condenser options .....	111
<b>CHAPTER 7   EVAPORATOR CALCULATION .....</b>	<b>112</b>
7.1 evaporator calculation .....	112
7.1.1 Introduce about evaporator .....	112
7.1.2 Evaporator analysis selection .....	112
7.1.3 Evaporator calculation and design .....	113
7.1.4 Hydrodynamic evaporator calculation: .....	117
7.1.5 Strength evaporator calculation .....	118
7.2 Evaporator option .....	121
7.3 ANCILLARY EQUIPMENT .....	121
7.3.1 Oil Separator : .....	121
7.3.2 Dehumidifier filter .....	122
7.3.3 Types of valves: .....	123
<b>CHAPTER 8   CALCULATION OF COOLING TOWER .....</b>	<b>126</b>
8.1 COOLING TOWER .....	126
8.1.1 PRINCIPLE OF OPERATION OF COOLING TOWER .....	126
8.1.2 CALCULATION COOLING TOWER .....	127
8.2 TEMPERATURE FOR THERMAL COOLING .....	131
8.3 SELECT THE COOLING TOWER .....	134
<b>CHAPTER 9   DESIGN OF COLD WATER DISTRIBUTION SYSTEM .....</b>	<b>135</b>
9.1 CALCULATION METHOD: .....	135
9.1.1 CALCULATION OF WATER PIPE CONNECTED WITH AHU,FCU ...	135

9.1.2 CALCULATING OF WATER PIPE IN CHILLER ROOM .....	140
9.2 Calculate gas-tube size of the compressor .....	143
9.2.1 Calculation the size of gas pipe size: .....	143
9.2.2 Calculation the size of liquid pipe size: .....	148
9.3 CALCULATION OF PRESSURE COLUMN .....	153
9.3.1 Calculation of pressure column of cold water pump .....	153
9.3.2 Re in the main pipe of the Central plants: .....	153
9.3.3 Re in the branch pipe of the Centrals plants : .....	154
9.4 selection of pump: .....	158
9.4.1 Calculate and select water pump for supply pipe: .....	158
9.4.2 Calculate and select water pump for return pipe: .....	158
<b>CHAPTER 10   CALCULATION AND DESIGN DUCT SYSTEM.....</b>	<b>160</b>
10.1 GENERAL INTRODUCTION .....	160
10.1.1 Duct.....	160
10.1.2 Diffuser, mouth vent .....	160
10.2 METHODS OF CALCULATION DUCT .....	161
10.2.1 Deceleration method .....	161
10.2.2 Equal friction method .....	161
10.2.3 Static pressure recovery method .....	162
10.2.4 T method .....	162
10.2.5 Method constant speed .....	162
10.2.6 Method pressure method.....	162
10.3 CALCULATE OF DUCT SYSTEM .....	163
10.3.1 Calculation of ventilation toilets.....	163
10.3.2 Calculation of Fresh air .....	166
<b>CHAPTER 11   POWER SUPPLY SYSTEM .....</b>	<b>174</b>
11.1 OVERVIEW.....	174

11.2 LIghTING DESIGN .....	174
11.3 DETERMINE THE CALCULATION LOAD .....	179
11.4 DETERMINED CALCULATION LOAD FOR EACH FLOOR .....	193
11.5 CALCULATION LOAD FOR DISTRIBUTION CABINETS .....	198
11.6 VOLTAGE SWITCHES - PREVENTIVE DEVICE - COMPONENT COMPONENTS .....	199
11.6.1 CHOSE TRANSFORMERS .....	199
11.6.2 ELECTRIC POWER GENERATOR .....	200
11.6.3 COMPENSATION CAPACITY .....	200
11.7 CHOSE OF LINE - CALCULATION OF DROP .....	202
11.7.1 CHOSE OF LINE .....	202
11.7.2 - CALCULATION OF LIGHTNING .....	205
<b>CHAPTER 12  FIRE PROTECTION SYSTEM.....</b>	<b>208</b>
12.1 OVERVIEW.....	208
12.1.1 Design content .....	208
12.1.2 Requirements for fire protection system.....	209
12.1.3 Solution for designing fire systems. ....	210
12.2 INITIAL FIRE EXTINGUISHING FACILITIES AND WATER FIRE SYSTEM	210
12.2.1 Initial fire extinguishing facilities.....	210
12.2.2 Sprinkler automatic fire extinguishing system .....	211
12.2.3 Method of layout and design of wall hydrant fire fighting system .....	211
12.2.4 Method of layout and design of fire extinguishing system outside the house	211
12.2.5 System structure and principles of fire fighting system with water .....	212
12.2.6 Calculation steps of hydraulic piping system .....	212
12.2.7 Calculate the volume of the fire fighting tank .....	216
12.3 DESIGNING THE AUTOMATIC FIRE ALARM SYSTEM .....	217
12.3.1 GENERAL DESCRIPTION.....	217
12.3.2 AUTOMATIC FIRE ALARM SYSTEM .....	217

---

12.3.3 DESIGN OPTIONS.....	217
12.4 Smoke detector .....	218
12.4.1 SPECIFIC ROUND DETECTION.....	218
12.4.2 BEAM TYPE REQUIREMENTS.....	218
12.5 HEAT DETECTORS .....	219
12.5.1 FIXED THERMOSTAT.....	219
12.5.2 ADDITIONAL HEAT TUBE .....	220
12.6 Fire Alarms.....	220
12.7 EMERGENCIES .....	220
12.8 ALARM BELL.....	220
12.9 FIRE ALARM.....	221
12.10 LAMP.....	221
12.11 LIGHT SWITCHES .....	222
12.12 FIRE ALARM.....	222
<b>CHAPTER 13 DESIGN OF WATER SUPPLY AND DRAINAGE SYSTEMS.....</b>	<b>223</b>
13.1 Water Supply Systems: .....	223
13.1.1 Overview:.....	223
13.1.2 Calculation of water supply system flow: .....	224
13.1.3 Calculation chose water tank: .....	226
13.1.4 CALCULATE AND CHOOSE WATER PUMP.....	226
13.2 SANITARY SYSTEM.....	227
13.3 RAIN WATER SYSTEM .....	229

---
