Peter Schroeder-Heister, *University of Tübingen, Tübingen, Germany*

Yde Venema, *University of Amsterdam, Amsterdam, The Netherlands*

Andreas Weiermann, *University of Ghent, Ghent, Belgium*

Frank Wolter, *University of Liverpool, Liverpool, UK*

Ming Xu, *Wuhan University, Wuhan, People's Republic of China*

*Founding editor*

Ryszard Wójcicki, *Polish Academy of Sciences, Warsaw, Poland*

SCOPE OF THE SERIES

The book series Trends in Logic covers essentially the same areas as the journal *Studia Logica*, that is, contemporary formal logic and its applications and relations to other disciplines. The series aims at publishing monographs and thematically coherent volumes dealing with important developments in logic and presenting significant contributions to logical research.

The series is open to contributions devoted to topics ranging from algebraic logic, model theory, proof theory, philosophical logic, non-classical logic, and logic in computer science to mathematical linguistics and formal epistemology. However, this list is not exhaustive, moreover, the range of applications, comparisons and sources of inspiration is open and evolves over time.
