1	Introduction	1
1.1	This Regional Master Plan	1
1.2	The Consultants	1
1.3	The Project Team	3
2	The Jordan Valley	5
2.1	Introduction	5
2.2	The Jordan Valley	5
2.2.1	Land Use	5
2.2.2	Climate Change	7
2.2.3	Pollution Sources	16
2.2.4	Cultural Heritage	22
2.2.5	Infrastructure	27
2.3	It's People	30
2.3.1	Population	30
2.3.2	Socio-economic Situation	30
2.3.3	Agriculture	34
2.3.4	Tourism	38
2.3.5	Industry	41
2.3.6	Human Water Demands and Supply	43
2.3.7	WEAP Model for the Jordan Valley	46
2.4	It's Governance	49
2.4.1	Stakeholders in the Jordan Valley	49
2.4.2	Governance of the Jordan Valley	53
2.4.3	Current International Agreements and Co-operation Issues	56
2.4.4	Outlook for Future Security Arrangements	59
3	Projections and Objectives	61
3.1	Projections for 2025 and 2050	61
3.2	Strategic Planning Objectives	64
3.2.1	Introduction	64
3.2.2	Pollution Control and Sanitation	64
3.2.3	Sustainable Water Management and River Rehabilitation	65
3.2.4	Sustainable Agriculture	66
3.2.5	Jordan Valley Governance	67
3.2.6	Ecological Rehabilitation	67
3.2.7	Sustainable Tourism and Cultural Heritage Development	67
3.2.8	Sustainable Urban, Energy and Infrastructure Development	68

4 Meeting the Strategic Planning Objectives	71
4.1 The Interventions	71
4.1.1 Pollution Control and Sanitation	72
4.1.2 Sustainable Water Management and River Rehabilitation	77
4.1.3 Sustainable Agriculture	79
4.1.4 Jordan Valley Governance	80
4.1.5 Ecological Rehabilitation	81
4.1.6 Sustainable Tourism and Cultural Heritage Development	83
4.1.7 Sustainable Urban, Energy and Infrastructure Development	85
4.2 Priority Setting	86
4.2.1 Introduction	86
4.2.2 Short Term Versus Long Term Interventions	86
4.3 Disbursement and Finance	87
4.4 Institutional and Governance Aspects	88
5 The Year 2050	91
5.1 The Economy of the Jordan Valley in 2050	91
5.2 Land Use in 2050	94
5.3 Water Related Impacts in 2050	96
5.4 The Jordan River in 2050	96
5.4.1 Assumptions	96
5.4.2 Salinity	98
5.4.3 Groundwater Contribution	99
5.4.4 Water Supply Assumptions	100
5.4.5 Impacts on Flows in the Jordan River	102
5.5 Environmental Flows by 2050	103
5.5.1 Introduction	103
5.5.2 Environmental Flow Alternatives	103
5.5.3 Environmental Flow Regime for 2050	105
5.6 Sensitivity Analysis	105
6 Final Conclusions and Recommendations	109
Annexes to Regional NGO Master Plan for Sustainable Development in the Jordan Valley	113

Abbreviations

AMWA	Afikey Maim Water Association
CA	Current accounts (WEAP)
DOA	Department of Agriculture (Jordan)
dunum	Surface area unit: 0.1 ha
EcoPeace	EcoPeace Middle East, (formerly Friends of the Earth Middle East)
ET	Evapotranspiration
EXACT-ME	Executive Action Team—Middle East
FMS	Frequent maximum salinity
GDP	Gross domestic product
GoJ	Government of Jordan
HEIA	High external inputs agriculture
IWA	Israeli Water Authority
IWRM	Integrated water resources management
JD	Jordanian dinar
JRV	Jordan River Valley
JVA	Jordan Valley Authority (Jordan)
JVWA	Jordan Valley Water Association (Israel)
KAC	King Abdullah Canal (Jordan)
KWh	Kilowatt-hour
L/s	Liter per second
LEISA	Low external input sustainable agriculture
LJR	Lower part of the Jordan River
m ³ /s	Cubic meter per second
MCM	Million cubic meters
mg/l	Milligram per liter
MoA	Ministry of Agriculture (Israel)
MSL	Mean sea level
NGO	Non-governmental Organization
NIS	New Israeli Shekel
NPA	Nature and Parks Authority (Israel)
NWC	National Water Carrier (Israel)
PCBS	Palestinian Central Bureau of Statistics
ppm	Parts per million
PWA	Palestinian Water Authority
RS	Reintroduced scenario (WEAP)
SoG	Sea of Galilee
SWC	Saline Water Carrier
SWM	Solid waste management
THS	Tiberias Hot Springs
UJR	Upper Jordan River
WBWD	West Bank Water Department (Palestine)

WEAP	Water Evaluation and Planning System
WW	Wastewater
WWTP	Wastewater treatment plant
ZS	Zero scenario (WEAP)

List of Figures
