Part I From Molecular Mechanism to Intervention for Congenital Heart Diseases, Now and the Future	
Perspective	1
Toshio Nakanishi	
1 Reprogramming Approaches to Cardiovascular Disease: From Developmental Biology to Regenerative Medicine	3
Deepak Srivastava	
2 The Arterial Epicardium: A Developmental Approach to Cardiac Disease and Repair	11
Adriana C. Gittenberger-de Groot, E.M. Winter, M.J. Goumans, M.M. Bartelings, and R.E. Poelmann	
3 Cell Sheet Tissue Engineering for Heart Failure	19
Hidekazu Sekine, Tatsuya Shimizu, and Teruo Okano	
4 Future Treatment of Heart Failure Using Human iPSC-Derived Cardiomyocytes	25
Shugo Tohyama and Keiichi Fukuda	
5 Congenital Heart Disease: In Search of Remedial Etiologies	33
Roger R. Markwald, Shibnath Ghatak, Suniti Misra, Ricardo A. Moreno-Rodríguez, Yukiko Sugi, and Russell A. Norris	
Part II Left-Right Axis and Heterotaxy Syndrome	
Perspective	47
Bradley B. Keller	
6 Left-Right Asymmetry and Human Heterotaxy Syndrome	49
Isao Shiraishi	
7 Roles of Motile and Immotile Cilia in Left-Right Symmetry Breaking	57
Hiroshi Hamada	

8	Role of Cilia and Left-Right Patterning in Congenital Heart Disease	67
	Nikolai Kléna, George Gabriel, Xiaoqin Liu, Hisato Yagi, You Li, Yu Chen, Maliha Zahid, Kimimasa Tobita, Linda Leatherbury, Gregory Pazour, and Cecilia W. Lo	
9	Pulmonary Arterial Hypertension in Patients with Heterotaxy/Polysplenia Syndrome	81
	Akimichi Shibata, Keiko Uchida, Jun Maeda, and Hiroyuki Yamagishi	
Part III Cardiomyocyte and Myocardial Development		
	Perspective	83
	Adriana C. Gittenberger-de Groot	
10	Single-Cell Expression Analyses of Embryonic Cardiac Progenitor Cells	85
	Kenta Yashiro and Ken Suzuki	
11	Meis1 Regulates Postnatal Cardiomyocyte Cell Cycle Arrest	93
	Shalini A. Muralidhar and Hesham A. Sadek	
12	Intercellular Signaling in Cardiac Development and Disease: The NOTCH pathway	103
	Guillermo Luxán, Gaetano D'Amato, and José Luis de la Pompa	
13	The Epicardium in Ventricular Septation During Evolution and Development	115
	Robert E. Poelmann, Bjarke Jensen, Margot M. Bartelings, Michael K. Richardson, and Adriana C. Gittenberger-de Groot	
14	S1P-S1p2 Signaling in Cardiac Precursor Cells Migration	125
	Hajime Fukui, Shigetomo Fukuhara, and Naoki Mochizuki	
15	Myogenic Progenitor Cell Differentiation Is Dependent on Modulation of Mitochondrial Biogenesis through Autophagy	127
	Yoshimi Hiraumi, Chengqun Huang, Allen M. Andres, Ying Xiong, Jennifer Ramil, and Roberta A. Gottlieb	
16	The Role of the Thyroid in the Developing Heart	129
	Kazuhiro Maeda, Sachiko Miyagawa-Tomita, and Toshio Nakanishi	
Part IV Valve Development and Diseases		
	Perspective	131
	Roger R. Markwald	
17	Atrioventricular Valve Abnormalities: From Molecular Mechanisms Underlying Morphogenesis to Clinical Perspective . . .	135
	Kei Inai	

18	Molecular Mechanisms of Heart Valve Development and Disease . . .	145
	M. Victoria Gomez Stallons, Elaine E. Wirrig-Schwendeman, Ming Fang, Jonathan D. Cheek, Christina M. Alfieri, Robert B. Hinton, and Katherine E. Yutzey	
19	A Novel Role for Endocardium in Perinatal Valve Development: Lessons Learned from Tissue-Specific Gene Deletion of the Tie1 Receptor Tyrosine Kinase	153
	Xianghu Qu and H. Scott Baldwin	
20	The Role of the Epicardium in the Formation of the Cardiac Valves in the Mouse	161
	Marie M. Lockhart, Maurice van den Hoff, and Andy Wessels	
21	TMEM100: A Novel Intracellular Transmembrane Protein Essential for Vascular Development and Cardiac Morphogenesis	169
	Ken Mizuta, Masahide Sakabe, Satoshi Somekawa, Yoshihiko Saito, and Osamu Nakagawa	
22	The Role of Cell Autonomous Signaling by BMP in Endocardial Cushion Cells in AV Valvuloseptal Morphogenesis	171
	Yukiko Sugi, Bin Zhou, Kei Inai, Yuji Mishina, and Jessica L. Burnside	
Part V	The Second Heart Field and Outflow Tract	
	Perspective	175
	Seema Mital	
23	Properties of Cardiac Progenitor Cells in the Second Heart Field	177
	Alexandre Francou and Robert G. Kelly	
24	Nodal Signaling and Congenital Heart Defects	183
	Ralston M. Barnes and Brian L. Black	
25	Utilizing Zebrafish to Understand Second Heart Field Development	193
	H.G. Knight and Deborah Yelon	
26	A History and Interaction of Outflow Progenitor Cells Implicated in “Takao Syndrome”	201
	Hiroyuki Yamagishi, Kazuki Kodo, Jun Maeda, Keiko Uchida, Takatoshi Tsuchihashi, Akimichi Shibata, Reina Ishizaki, Chihiro Yamagishi, and Deepak Srivastava	
27	The Loss of Foxc2 Expression in the Outflow Tract Links the Interrupted Arch in the Conditional Foxc2 Knockout Mouse	211
	Mohammad Khaja Mafij Uddin, Wataru Kimura, Mohammed Badrul Amin, Kasumi Nakamura, Mohammad Johirul Islam, Hiroyuki Yamagishi, and Naoyuki Miura	

28	Modification of Cardiac Phenotype in <i>Tbx1</i> Hypomorphic Mice	215
	Takatoshi Tsuchihashi, Reina Ishizaki, Jun Maeda, Akimichi Shibata, Keiko Uchida, Deepak Srivastava, and Hiroyuki Yamagishi	
Part VI Vascular Development and Diseases		
	Perspective	219
	H. Scott Baldwin	
29	Extracellular Matrix Remodeling in Vascular Development and Disease	221
	Kyoko Imanaka-Yoshida	
30	The “Cardiac Neural Crest” Concept Revisited	227
	Sachiko Miyagawa-Tomita, Yuichiro Arima, and Hiroki Kurihara	
31	Roles of Endothelial Hrt Genes for Vascular Development	233
	Masahide Sakabe, Takashi Morioka, Hiroshi Kimura, and Osamu Nakagawa	
32	Inositol Trisphosphate Receptors in the Vascular Development	237
	Keiko Uchida, Maki Nakazawa, Chihiro Yamagishi, Katsuhiko Mikoshiba, and Hiroyuki Yamagishi	
33	Tissue Remodeling in Vascular Wall in Kawasaki Disease-Related Vasculitis Model Mice	241
	Yukako Yoshikane, Mitsuhsa Koga, Tamaki Cho, Kyoko Imanaka-Yoshida, Yumi Yamamoto, Junichi Hashimoto, Hiroki Aoki, Koichi Yoshimura, and Shinichi Hirose	
Part VII Ductus Arteriosus		
	Perspective	243
	Susumu Minamisawa	
34	Progerin Expression during Normal Closure of the Human Ductus Arteriosus: A Case of Premature Ageing?	245
	Adriana C. Gittenberger-de Groot, Regina Bokenkamp, Vered Raz, Conny van Munsteren, Robert E. Poelmann, Nimrat Grewal, and Marco C. DeRuiter	
35	The Multiple Roles of Prostaglandin E₂ in the Regulation of the Ductus Arteriosus	253
	Utako Yokoyama, Susumu Minamisawa, and Yoshihiro Ishikawa	
36	Developmental Differences in the Maturation of Sarcoplasmic Reticulum and Contractile Proteins in Large Blood Vessels Influence Their Contractility	259
	Emiko Hayama and Toshio Nakanishi	

37 Fetal and Neonatal Ductus Arteriosus Is Regulated with ATP-Sensitive Potassium Channel	263
Kazuo Momma, Mika Monma, Katsuaki Toyoshima, Emiko Hayama, and Toshio Nakanishi	
Part VIII Conduction System and Arrhythmia	
Perspective	267
Michael Artman	
38 Regulation of Vertebrate Conduction System Development	269
Jan Hendrik van Weerd and Vincent M. Christoffels	
39 Cardiac Pacemaker Development from a Tertiary Heart Field	281
Michael Bressan, Gary Liu, Jonathan D. Louie, and Takashi Mikawa	
40 Endothelin Receptor Type A-Expressing Cell Population in the Inflow Tract Contributes to Chamber Formation	289
Rieko Asai, Yuichiro Arima, Daiki Seya, Ki-Sung Kim, Yumiko Kawamura, Yukiko Kurihara, Sachiko Miyagawa-Tomita, and Hiroki Kurihara	
41 Specific Isolation of HCN4-Positive Cardiac Pacemaking Cells Derived from Embryonic Stem Cells	291
Kumi Morikawa, Yasuaki Shirayoshi, and Ichiro Hisatome	
Part IX Current Molecular Mechanism in Cardiovascular Development	
Perspective	293
Osamu Nakagawa	
42 Combinatorial Functions of Transcription Factors and Epigenetic Factors in Heart Development and Disease	295
Kazuko Koshiba-Takeuchi, Yuika Morita, Ryo Nakamura, and Jun K. Takeuchi	
43 Pcgf5 Contributes to PRC1 (Polycomb Repressive Complex 1) in Developing Cardiac Cells	305
Manabu Shirai, Yoshihiro Takihara, and Takayuki Morisaki	
44 Noncoding RNAs in Cardiovascular Disease	313
Masaharu Kataoka and Da-Zhi Wang	
Part X iPS Cells and Regeneration in Congenital Heart Diseases	
Perspective	319
Deepak Srivastava	
45 Human Pluripotent Stem Cells to Model Congenital Heart Disease	321
Seema Mital	

46	Engineered Cardiac Tissues Generated from Immature Cardiac and Stem Cell-Derived Cells: Multiple Approaches and Outcomes	329
	Bradley B. Keller, Fei Ye, Fangping Yuan, Hiren Trada, Joseph P. Tinney, Kevin M. Walsh, and Hidetoshi Masumoto	
47	Dissecting the Left Heart Hypoplasia by Pluripotent Stem Cells	337
	Junko Kobayashi, Shunji Sano, and Hidemasa Oh	
48	Lentiviral Gene Transfer to iPS Cells: Toward the Cardiomyocyte Differentiation of Pompe Disease-Specific iPS Cells	341
	Yohei Sato, Takashi Higuchi, Hiroshi Kobayashi, Susumu Minamisawa, Hiroyuki Ida, and Toya Ohashi	
49	Molecular Analysis of Long-Term Cultured Cardiac Stem Cells for Cardiac Regeneration	345
	Nanako Kawaguchi, Yohtaroh Takagaki, Rumiko Matsuoka, and Toshio Nakanishi	
50	Minor Contribution of Cardiac Progenitor Cells in Neonatal Heart Regeneration	349
	Wataru Kimura, Shalini A. Muralidhar, and SuWanee Thet	
Part XI	Current Genetics in Congenital Heart Diseases	
	Perspective	353
	Hiroyuki Yamagishi	
51	Genetic Discovery for Congenital Heart Defects	355
	Bruce D. Gelb	
52	Evidence That Deletion of ETS-1, a Gene in the Jacobsen Syndrome (11q-) Cardiac Critical Region, Causes Congenital Heart Defects through Impaired Cardiac Neural Crest Cell Function	361
	Maoqing Ye, Yan Yin, Kazumi Fukatsu, and Paul Grossfeld	
53	Notch Signaling in Aortic Valve Development and Disease	371
	Vidu Garg	
54	To Detect and Explore Mechanism of CITED2 Mutation and Methylation in Children with Congenital Heart Disease	377
	Wu Xiaoyun, Xu Min, Yang Xiaofei, Hu Jihua, and Tian Jie	
	Erratum to: Etiology and Morphogenesis of Congenital Heart Disease	E1
